Summary

Mobile Software Engineer specialized in building and maintaining high-quality, complex cross-platform applications using Flutter and Dart. Experienced in scalable architecture (Clean Architecture, MVVM) and modular SDK design, delivering high-performance cross-platform apps with full release lifecycle ownership across Google Play and App Store. Strong background in CI/CD automation, real-time features, and white-label development within Agile/Scrum environments.

Work Experience

07/2023 - Present | Mobile Software Engineer | Continuous Net, Tunisia

Agile/Scrum team member (3 frontend developers, 2 backend developers, QA, UI/UX, PO, SM), delivering 3 production apps live on the App Store and Google Play Store ([Sunshine Vacances](#), [ZenifyTrip](#), [TunisiePromo](#)).

- Architected a white-label travel app from scratch with full multi-client configuration, enabling clean environment isolation (dev/staging/prod) and per-client branding through a modular SDK ecosystem of 6+ reusable Flutter packages and plugins, reducing development time by 40%
- Designed and configured end-to-end CI/CD pipelines (GitLab, Fastlane) from scratch with multi-flavor builds and Clean Architecture & MVVM, achieving 80% test coverage through unit, widget, and integration testing to ensure reliability and robustness
- Implemented real-time and transactional features, including secure in-app purchases and payment integration (via REST APIs and WebSockets), using Riverpod for state management, GoRouter and GetX for navigation, and Dio/Retrofit for networking.
- Owned the full release lifecycle including store submission, signing, compliance, and technical documentation.

02/2023 - 07/2023 | Mobile Developer (Intern) | Continuous Net, Tunisia

- Developed a high-quality, user-friendly cross-platform app (traveler & tour guide) with multi-provider authentication (Google, Facebook, email), integrating REST APIs and Riverpod state management to handle dynamic role-based content across Android and iOS
- Built responsive, role-adaptive UIs from Figma designs featuring place discovery and traveler-to-guide communication flows, closely collaborating with backend and UX/UI teams to align API contracts and ensure consistent experience across both platforms

06/2022 - 08/2022 | Web Developer (Intern) | DRÄXLMAIER Group, Tunisia

- Built a PHP/Laravel document archiving system with role-based access control, supporting multiple file formats (PDF, DOCX, images) for 30+ internal users
- Optimized database queries and frontend rendering, reducing page load time by 25% and improving document browsing workflows

10/2021 - 03/2022 | Mobile Developer (Intern) | ENSI | Municipal Services Mobile App

- Built and customized a Flutter app digitalizing municipal services (ticket booking, appointments, WebSocket chat) with Provider and Hive for state management and local storage.
- Integrated Google Maps, Firebase for authentication, and role-based system (citizens, employees, admins) with incident reporting and media uploads.

Technical Project

ImageFlow – Smart Image Processing & OCR App [link](#)

Flutter | ML Kit | GetX | Computer Vision | Clean Architecture

- Created an intelligent Flutter application integrating Google ML Kit to perform smart image processing, including face detection with B&W filtering and document scanning with OCR.
- Executed automated content detection and enhancement, enabling accurate extraction of text, contrast adjustment, and PDF export of documents.
- Built a history and searchable results feature with thumbnails and metadata, improving user experience and accessibility of processed images.

Technical Skills

Languages: Dart, JavaScript, Knowledge of Kotlin, Swift

Mobile Development: Flutter, Firebase, Provider, BLoC, GetX, Riverpod, Hive, Android, iOS

Architecture & Design: MVVM, Clean Architecture, Design System

Networking: RESTful APIs, JSON, HTTP, GraphQL, Dio, Retrofit, WebSockets

CI/CD & Tools: Git/ GitHub, GitLab CI/CD, GitHub Actions, Fastlane, Xcode

Testing & Release: Unit, Widget and Integration tests, Google Play Store, App Store

Education

09/2020 - 07/2023

Engineering Degree in Computer Science (EQF Level 7)

National Engineering School of Computer Science - **ENSI**

09/2017 - 07/2020

Bachelor's Degree in Mathematics and Applications

Higher Institute of Computer Science and Mathematics - **ISIMM**

Languages

Arabic (Native) **English** (Professional) **French** (Professional)
